

JERSEY CENTRAL POWER & LIGHT
NET METERING AND INTERCONNECTION REPORT
JANUARY 1, 2011 TO JUNE 30, 2011

New Customer Generators Installed During Current Reporting Period July 1 - December 31, 2010

	PV	Wind	Biomass	Total
Number of Systems	798	3	0	801
Generation Rating in kW	24,343	81	0	24,424

Cumulative Systems Interconnected at End of Reporting Period

	PV	Wind	Biomass	Total
	4,085	11	1	4,097

Estimated Total kWh Supplied to the Distribution System from Customer Generators (1)

29,211,600

Estimated Total kWh Delivered to Customer-Generator through the Distribution System

101,963,953

Dollar Amount Paid to Customer-Generators for Excess Generation at End of Annualized Period

	Number of Accounts with Anniversary	Anniversary Credits
January-11	41	\$7,153.05
February-11	28	\$2,759.23
March-11	46	\$11,733.58
April-11	58	\$12,486.23
May-11	70	\$4,605.10
June-11	102	\$5,813.86
Total: Jan -> June 2011 ==>	345	\$44,551.05

{1} Based on 1,200 kWh annual generation per connected photovoltaic kW, 25% output efficiency factor for wind systems and 40% output efficiency factor for biomass systems.
